St. Ludovico of Casoria

St. Ludovico often said, "A town where there is no hospital for the poor is a dead town."

COVER STORY

WHAT WAS THE busiest place outside the

tournament hall at the 2024 National High School (K-12) Championships? It was room 337 at the Baltimore Convention Center, where girls from all over the country played human chess, did their nails, and had a lot of fun. You might know it better as the Girls Club.

Why is the Girls Club so important? Most players at national events are boys, many of whom know each other from previous tournaments. They analyze their games, play bughouse, run around, and play pranks on chess moms and dads.

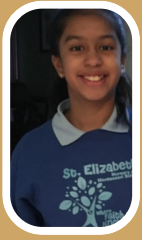

It's important for girls to meet each other too, and to have a chance to learn from each other and bond. Over the years, the

US Chess Women's Committee decided to create the Girls Club, where girls and their families could hang out between rounds with friends old and new.

The Girls Club is the perfect place to chill! Here we get to play chess, do treasure hunts,

St. Elizabeth was my home away from home. I attended the school from Montessori B to 6th grade. I learned so much from all my wonderful teachers, whether it was my language arts teacher who made me realize I had a love for writing poetry or my science teacher who introduced me to the “fancy” world of S.T.E.A.M through the club that she ran. My teachers encouraged me in my thirst for knowledge and taught me life skills that would always help me. In sixth grade, we held the first student council election, where I ran for president. Although I did not win, my time serving on the council helped me to develop leadership skills that I use today. Unfortunately, my time at the school was cut short due to COVID-19, but I never forgot all the knowledge and memories that I acquired during my time at St. Elizabeth.

After I graduated, I went to continue my education at Villa Walsh Academy where I currently attend as a sophomore. Every skill that I learned at St. Elizabeth has stuck with me throughout the four years I have attended Villa. For example, the leadership skills that I acquired led me to be a Student Ambassador this year and to have a crucial role on our school’s robotics team, Sisters 1st. I have been on the robotics team since last year and am currently on all four tech subteams: Build, CAD, Programming, and Scouting – where I am one of the two captains of the Scouting subteam. This year, I was asked to temporarily join Program Management to help recruit new members to join the team which I will continue to do in the future. On top of that, I had the incredible opportunity to be the strategy captain and technician, one of the five members of the drive team this year. Our team was very successful and fortunate enough to attend the world championships in Houston, Texas as the only all-female team in New Jersey. With the leadership skills that St. Elizabeth taught me, I will continue to use those skills as the coach, another role on the drive team for next year’s season.

Although I am only a sophomore in high school, I believe that if it wasn’t for the introduction of S.T.E.A.M at St. Elizabeth Nursery & Montessori School, I would have never discovered my passion for engineering. I hope to follow my passion for engineering when I attend college in two years either at Rutgers University or New Jersey Institute of Technology. But if it wasn’t for the school as a whole, I would not be the person that I am today. I will be forever grateful to the incredible family I had at St. Elizabeth.
